Indo Power Projects Ltd., formally known as “Power Projects”, was founded by an entrepreneur Electrical Engineer from I.I.T. Kharagpur in 1978. In first 10 years the company carried out a number of electrical installations on behalf of renowned Electrical Construction companies like Siemens, Best & Crompton Engg. Ltd., etc. The Company had specialised to take the entire responsibilities from unloading, receipt, storage, security, shifting, erection, testing & commissioning of the entire electrical installation behalf of main contractor leaving the supply of major equipment to the prime contractor, since the Company had financial limitations in supplying high value equipment. Being an efficient erection contractor, the Company could bag repeated orders from reputed firms.
